WHO WE ARE

AM-PRODUCTS

Our company is based out of Chennai India and was established in the year 2019, we are a leading Manufacturer of Engineering Equipment, Specialising in making Sealant Pump. Val-Lubric has a strong team of Qualified Engineers, Quality and Marketing Managers who have been constantly thriving to understand the Market and have analysed that there are many Products available in the past and current time that requires technical specialisation starting from Designing, Manufacture, Plating, Honing, Heat-Treatment, Testing, Assembly and finally resulting in well Packaged Products ready to ship Globally.

Val-Lubric Industries is one such entity which is equipped with all such capabilities and we have in-house design facilities such as Solid-Modelling and several CNC Turning Centre and Vertical Machining Centre which are used to Machine High Precision Parts at a High accuracy with superior finish.

Val-Lubric is primarily concerned with Machining Parts in-house for the Sealant Pump and all other services such as Heat-Treatment, Honing, Plating, Blackening are out-sourced to certified qualified Vendors.

Our ability to Manufacture High Quality Products consistently enables our technicians to apply a scientific and systematic approach to using the products for problem solving.

The Valve Products we now offer are the result of our over twenty years experience of discovering practical solutions that really work in all types and requirements for the Valve Industry.

HYDRAULIC SEALANT PUMP

OUTLOOK

Hydraulic Sealant Pumps are needed for High Pressure Applications. Benefits include operating ease and smooth efficiency. Usable in any position, these pumps are rugged, long lasting, Precision Manufactured and are recommended for High Temperature and Harsh Environment services such as steam, hot oil, hot compressed gas, and offshore.

APPLICATIONS FOR THE HYDRAULIC SEALANT PUMP INCLUDE

- Lubricating Pumps and Ball, Gate and Plug Valves.
- Pipelines conveying Chemicals, Crude or Refined Oil, Natural Gas, LPG, Hydrocarbons and other fuels, pumping and Compressor Stations, Refineries and Chemical plants.
- Steel mills, Lumber and Paper Mills, Gas and Oil drilling / Production Fields, Asphalt, Rubber, Water and Sewage Treatment plants, Heavy Equipment, Manufacturing, Mining, Marine, Industrial and Municipal utilities.

FEATURES OF THE HYDRAULIC SEALANT PUMP

- Rated to 10,000 PSI.
- Safety latch and tamper proof Internal Relief Valve.
- Detachable Handle.
- Handle used as push rod to return Barrel Piston and to lock and unlock Barrel Cap.
- Superior performance with viscous Lubricants, Sealants and Packing.
- Easily serviceable and all replacement parts are readily available.
- Double By-Pass Valve Stop and Sliding Stop Link.
- Easily refilled with Sticks or bulk.
- Heavy duty Metal Construction.
- Handle Retaining Strap
- "Sure grip" surfaces.
- Corrosion resistant.
- Easily refilled.

OUR FOCUS

- **CUSTOMER SATISFACTION BY PROMPT AND EFFICIENT DELIVERY.**
- **BUILDING STRONG AND LASTING RELATIONSHIPS BASED ON INTEGRITY, LOYALTY AND TRUST.**
- **PROBLEM SOLVING AND CREATIVE CUSTOMER SOLUTIONS.**
- **PRODUCT RELIABILITY AND LONGEVITY**
